

CROSS PROTECTION®

PRODUCT

CATALOGUE

**MANUFACTURER OF DENTAL AND MEDICAL
DISPOSABLE PRODUCTS**

Cross Protection is a 100% Malaysian owned organization established since 1997, named after the widely recognized signature cross symbol in the medical industry and its utmost objective in providing the best protection. The logo, featuring a heart symbolizes the core value to produce only the finest quality products for our clients with all our heart. The overlaps of the heart portrays the crossed arms of medical professionals expressing the idea that you are in safe hands.

The company originated as a trading establishment which has gradually advanced into a manufacturing corporation today - incorporating more than 120,000sqft of manufacturing plant, specializing in R&D for custom designed healthcare products that conforms to international standards and qualifications. With our in-house registered brand "Cross Protection", we are pleased to serve clients from over 38 different countries globally and we are renowned for our leading OEM services for our clients.

OUR MISSION

To deliver the finest quality products and services at the most competitive prices

OUR VISION

To become a global leader in infection prevention control products

OUR SERVICES

We supply various product scattered to different fields ranging from:

OUR QUALIFICATIONS

- MDA Registered MDA2012 (Act 737)
- Good Distribution Practice for Medical Devices (GDPMD)
- MITI Manufacturing License
- ISO 13485 : 2016
- PPE Certified Under EU 2016/425
- US FDA 510K Certified
- SATRA EU Certified
- SATRA UKCA Certified

WHY CHOOSE US?

Cross Protection® is proven reliable and every product produced is quality assured based on international lab testing standards and specifications.

CROSS PROTECTION®

DISPOSABLE FACE MASK

UNDERSTANDING ASTM & EN FACE MASK PERFORMANCE LEVELS

The first step begins with selecting the right surgical face mask based on its catered procedure and environment. Although masks may look similar, they each possess a notable difference in terms of quality, duty and filtration efficiency.

As a critical component of your Personal Protective Equipment (PPE) protocol, understanding and abiding by the ASTM performance level and EN standard of each surgical face mask will not only make selection effortless and straightforward but also crucial to your protection.

Cross Protection® surgical face masks assembled under ASTM and EN specifications material are designated as one or more of the following performance levels based on the quality, filtration level efficiency and barrier performance properties.

SPECIFICATION DEFINITIONS

- **Synthetic Blood / Splash Resistance Penetration** measures the mask's ability to prevent fluids from traveling through the material. The higher the fluid resistance (filtration), the better the protection. (Measured in mmHg.)
- **Bacterial Filtration Efficiency (BFE)** measures the mask's ability to prevent bacteria from traveling through the material. (Measured at 3 microns.)
- **Sub-micron Particulate Filtration Efficiency (PFE)** measures the mask's ability to prevent sub-micron particulates from traveling through the material. The size of the particles filtered is critical. (Measured at 0.1 micron.)
- **Differential Pressure (Delta P)** determines breathing resistance - the higher the Delta P, the less the breathability, but the better the filtration. (Measured in mmH₂O/cm²)
- **Flammability** is a ranking derived by laboratory standard test methodology of a material's propensity to burn rapidly and spread flames.
- **Microbial Cleanliness** it measures the total number of viable microorganisms on the face mask. The lower the value, the cleaner the mask. (Measured in CFU/g)

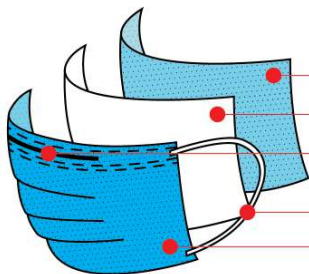

A rating system is designed to aid the convenience of your selection process. Cross Protection's surgical face masks are categorized based on various aspects performances achieving and some even exceeding the ASTM and EN standard and requirements.

Allow the displayed chart to assist your decision making on selecting the correct surgical face mask tailored specifically to your individual needs and requirements.

TEST	ASTM F2100			EN14683		
	Level 3	Level 2	Level 1	Type IIR	Type II	Type I
Synthetic Blood / Splash Resistance Penetration, mmHG / kPa	>160	>120	80	≥16.0	Not Required	Not Required
Bacterial Filtration Efficiency (BFE) %	≥98	≥98	≥95	≥98	≥98	≥95
Sub-micron Particulate Filtration Efficiency (PFE) %	≥85	≥85	≥80	Not Required	Not Required	Not Required
Delta P (mmH2O/cm ²) / (Pa/cm ²)	<6.0	<6.0	<5.0	<60.0	<40.0	<40.0
Flammability	Class 1	Class 1	Class 1	Not Required	Not Required	Not Required
Microbial Cleanliness (CFU/g)	Not Required	Not Required	Not Required	≤30	≤30	≤30

DESIGNED FOR A MORE COMFORTABLE WEARING EXPERIENCE

OUR MASK FEATURES:

INNER LAYER

- Polypropylene Spunbond Non-Woven Fabric
- Absorbs hot air exhaled from the body, leaving skin dry and comfortable

FILTRATION LAYER

- Polypropylene Meltblown Non-Woven Fabric
- Filter non-oily particles in the air

MOLDABLE NOSE CLIP

- Fit tightly against the face, effectively reduce harmful material suction

COTTON LOOPS

- High elastic earloops
- Wear for a long time without oppressive feeling, enhance the overall comfort levels

OUTER LAYER

- Polypropylene Spunbond Non-Woven Fabric
- Effectively block visible objects such as droplets

ASTM LEVEL 3

- Maximum barrier protection for any situation with potential of exposure to heavy levels of aerosols, sprays and fluids.
- Complex oral surgery.
- Crown preparation.
- Implant placement.
- Periodontal surgery.
- Use of ultrasonic scalers (Magnetostrictive and Piezo).
- Root planing & Scaling.

ASTM LEVEL 2

- Moderate barrier protection for low-to-moderate levels of aerosols, sprays and fluids.
- Limited oral surgery.
- Endodontics.
- Prophylaxis.
- Restoratives / composites.
- Sealants.

ASTM LEVEL 1

- Ideal for procedures where low amounts of fluid, spray or aerosols are produced.
- Patient exams.
- Operatory cleaning / maintenance.
- Impressions.
- Lab trimming, finishing & polishing.
- Orthodontics.

CROSS PROTECTION[®]

SURGICAL FACE MASK

SKIN IRRITATION - SKIN SENSITIZATION - CYTOTOXICITY

FREE FROM GRAPHENE MATERIAL

FACE MASK

Res-Q 300 Ultra (4ply)

A distinguished class of surgical face mask.

Meets EN 14683 - Type IIR

Meets ASTM F2100 - Level 3

Code : 2-407

Type : Earloop & Tie on

Packing : 40pcs x 20boxes

Res-Q 300 Plus (3ply)

Proven reliable protection against common pathogens and particulates.

Meets EN 14683 - Type IIR

Meets ASTM F2100 - Level 2

Code : 2-406

Type : Earloop & Tie on

Packing : 50pcs x 20boxes

Res-Q 300 Plus - Sensitive (3ply)

Catered to individuals with sensitive, allergy and easily irritated skin.

Meets EN 14683 - Type IIR

Meets ASTM F2100 - Level 2

Code : 2-426

Type : Earloop & Tie On

Packing : 50pcs x 20boxes

Res-Q 300 (3ply)

General standard for both procedural and surgical use.

Meets EN 14683 - Type II

Meets ASTM F2100 - Level 1

Code : 2-400

Type : Earloop & Tie on

Packing : 50pcs x 20boxes

Res-Q 300 Plus - Kids (3ply)
Catered to children aged between
4 to 12 years.

Meets EN 14683 - Type IIR

Meets ASTM F2100 - Level 2

Code : 2-688

Type : Earloop

Packing : 50pcs x 20boxes

Res-Q 300 Plus With Anti-fog Shield (3ply)

A 3 ply constructed surgical face mask
attached with an anti-fog clear shield

Meets EN 14683 - Type IIR

Meets ASTM F2100 - Level 2

Code : 2-401

Type : Earloop & Tie on

Packing : 25pcs

Face Shield (Anti-Fog)

Constructed with lightweight,
transparent anti-fog shields.

- Aid to increase peripheral protection
- Ideal for dental and medical industries

Code : 5-903

Packing : 10pcs x 1bag

Clip On (Face Mask)

Ideal for medical officers wearing hood,
tudung covers or hair tied in a bun.

- Effortless and convenient wearability
- Reusable

Code : FC001

Packing : 10pcs x 1bag

	Before Aging	After Aging
Force At Break	Min 6	Min 6
Tensile Strength	Min 18Mpa	Min 14Mpa
Elongation	Min 600%	Min 400%

INTENDED USE:

Medical device intended to be worn on the hand providing a barrier to minimize the cross contamination between staff and patient.

Selecting the right glove size for your hands ensure a secure fit around the fingers and palm. The cuff should also fit snugly around the wrist.

Xcel Latex Gloves Tacky Grip Extra Durable (Powder Free)

Taking hand protection solemnly, XCEL is designed to stand up to keep your hands safe longer, while delivering an amazing fit and level of comfort like no other. Its specialized formulated tacky grip will make sure nothing slips away from your hand.

Features:

- Full Palm Tacky / Finger Textured
- Beaded Cuff
- Advanced Stretch Formulation
- Ambidextrous

Material:

- Natural Rubber Latex

Treatment:

- Polymer Coated

Code	Size	Color	Length (mm)	Packing
550-CPF	XS	Natural off white	Minimum 240	100pcs x 10boxes

750-CPF	M			
850-CPF	L			
950-CPF	XL			

Xced Latex Gloves Standard (Powder Free)

Are you looking for the smart value latex examination gloves, without powder? XCED is a general-purpose latex disposable gloves that provides fair barrier protection suitable for tasks in examination, food service, janitorial and other applications.

Features:

- Full Palm / Finger Textured
- Beaded Cuff
- Advanced Stretch Formulation
- Ambidextrous

Material:

- Natural Rubber Latex

Treatment:

- Polymer Coated

850-ECOCPP	L			
950-ECOCPP	XL			

Xpert Latex Gloves Advance Stretch Extra Durable (Powdered)

Xpert Latex Powder Exam Glove gives you the ideal protection with 6 mil. finger thickness, while comes with powder for easy donning. This heavy-duty disposable gloves will keep you safe from exposing to high risk task in longer duration.

Features:

- Smooth Surface
- Beaded Cuff
- Lightly Powdered
- Ambidextrous

Material:

- Natural Rubber Latex

Treatment:

- Powdered with FDA Approved USP Absorbable Cornstarch

Code	Size	Color	Length (mm)	Packing

650-CP	S			
750-CP	M			
850-CP	L			
950-CP	XL			

Xtend Latex Gloves Standard (Powdered)

If you need a disposable with the mid-level protection, balanced with excellent flexibility and dexterity for lighter-duty applications, try XTEND. This latex lightly powdered examination gloves is an ideal balance of price and performances.

Features:

- Smooth Surface
- Beaded Cuff
- Lightly Powdered
- Ambidextrous

Material:

- Natural Rubber Latex

Treatment:

- Powdered with FDA Approved USP Absorbable Cornstarch

Code	Size	Color	Length (mm)	Packing

SURGEON CAP

**Poly Coated (Water Proof)**

- Poly Coated single use apparel
- Tie type
- Strong and stress resistant garment
- Effortless and convenient wearability
- Provides soft-feel comfort

Code : 2-715
 Type : Tie
 Color : White
 Packing : 100pcs x 10bags

**Premium (Extra Thick + Durable)**

- Premium disposable surgeon cap
- One size fits all
- Tailored for secure coverage from the back of the neck to the sideburn
- Effortless and convenient wearability
- Provides soft-feel comfort

Code : 2-702
 Type : Elastic, tie
 Color : Blue
 Packing : 100pcs x 10bags

**AAMI Level 3**

- AAMI Level 3 disposable surgeon cap
- Minimal to low fluid barrier protection
- Designed as a symbol of surgical profession
- Customized precisely to fit to perfection
- Ability to stay in proper, focused position
- Effortless and convenient wearability
- Provides soft-feel comfort

Code : 2-709
 Type : Elastic, tie
 Color : Blue
 Packing : 100pcs x 10bags

**AAMI Level 2**

- AAMI Level 2 disposable surgeon cap
- Minimal fluid barrier protection
- Designed as a symbol of surgical profession
- Customized precisely to fit to perfection
- Ability to stay in proper, focused position
- Effortless and convenient wearability
- Provides soft-feel comfort

Code : 2-703
 Type : Elastic, tie
 Color : Blue, yellow
 Packing : 100pcs x 10bags

ROUND CAP

Premium (Extra Thick + Durable)

- Well-made disposable round cap
- Tailored for secure full hair coverage
- Effortless and convenient wearability
- Provides soft-feel comfort

Code : 2-704

Color : Blue

Packing : 50pcs x 20bags

AAMI Level 3

- AAMI Level 3 disposable round cap
- Minimal to low fluid barrier protection
- Tailored for secure full hair coverage
- Effortless and convenient wearability
- Provides soft-feel comfort

Code : 2-705

Color : Blue

Packing : 50pcs x 20bags

AAMI Level 2

- AAMI Level 2 disposable round cap
- Minimal fluid barrier protection
- Tailored for secure full hair coverage
- Effortless and convenient wearability
- Provides soft-feel comfort

Code : 2-706

Color : Blue

Packing : 50pcs x 20bags

Basic

- Standard disposable round cap
- Tailored for secure full hair coverage
- Effortless and convenient wearability
- Gentle and lightweight

Code : 2-701

Color : Blue, pink, white,
yellow

Packing : 100pcs x 10bags

CLIP CAP

**Premium (Extra Thick + Durable)**

- Non woven extra thick disposable clip cap
- Compactly folded in strip
- Easily open in shape
- Tailored for secure full hair coverage
- Effortless and convenient wearability
- Provides soft-feel comfort

Code : 2-771

Color : Blue, white

Packing : 100pcs x 10bags

**Basic**

- Non woven disposable clip cap
- Compactly folded in strip
- Easily open in shape
- Tailored for secure full hair coverage
- Effortless and convenient wearability
- Provides soft-feel comfort

Code : 2-770

Color : White

Packing : 100pcs x 20bags

HOOD COVER

**Premium (Extra Thick + Durable)**

- Premium disposable hood cover
- Tailored for secure full hair coverage
- Effortless and convenient wearability
- Provides soft-feel comfort

Code : 2-774

Color : Blue

Packing : 50pcs x 10bags

TUDUNG COVER

**AAMI Level 3**

- AAMI Level 3 disposable tudung cover
- Minimal to low fluid barrier protection
- Single use material that prevents contamination
- Protection from the head until the shoulder region
- Tailored for secure full hair coverage
- Effortless and convenient wearability
- Provides soft-feel comfort

Code : 2-775

Color : Blue

Packing : 25pcs x 20bags

SLEEVE COVER

**Poly Coated (Water Proof)**

- Poly Coated single use apparel
- Knitted cuff for firm closure
- Strong and stress resistant garment
- Effortless and convenient wearability
- Provides soft-feel comfort

Code : 2-70P

Color : White

Packing : 20pcs x 10bags

**Basic**

- Non woven single use apparel
- Knitted cuff for firm closure
- Economical for daily usage

Code : 2-71P

Color : Dark Blue

Packing : 20pcs x 10bags

**AAMI Level 2**

- AAMI Level 2 single use apparel
- Minimal fluid barrier protection
- Knitted cuff for firm closure
- Reliable protection against isolate dust, particle, blood, bacteria and virus invasion
- Effortless and convenient wearability
- Provides soft-feel comfort

Code : 2-708

Color : Blue

Packing : 20pcs x 10bags

**Plastic**

- Polyethylene single use apparel
- Elastic cuff closure
- Reliable protection against spills, splashes, dirt and residue
- Effortless and convenient wearability
- Provides soft-feel comfort

Code : 4-500

Color : Blue

Packing : 100pcs x 10bags

Understanding European Standards for Chemical Protective Clothing

Cross Protection's Polycoated fabric is made entirely of polyethylene fibres, which are pressed together creating a uniform and strong structure. Unlike Coveralls made of non woven or SMS, these two materials are not dense enough to be tested and approved as Category III protective clothing. Disposable clothing made of PP will only be used as protection against dirt and/or product protection.

Regulation (EU) 2016/425 on Personal Protective Equipment

Category III includes exclusively the risks that may cause very serious consequences such as death or irreversible damage to health relating to the following:

Substances and mixtures which are hazardous to health

Atmospheres with oxygen deficiency

Harmful biological agents

Ionising radiation

High-temperature environments the effects of which are comparable to those of an air temperature of at least 100°C

Low-temperature environments the effects of which are comparable to those of an air temperature of 50°C or less

Falling from a height

Electric shock and live working

Drowning

Cuts by hand-held chainsaws

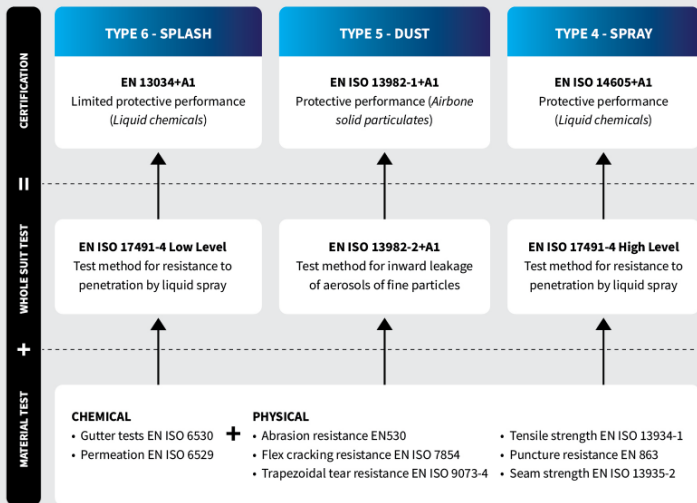

High-pressure jets

Bullet wounds or knife stabs

Harmful noise

COVERALL SUIT

European Standards for Chemical Protective Clothing

KAT. III Category III

Description of the design of protective clothing intended to protect against serious or fatal risks. The suits must be type-approved.

TYPE 5 Types 5 & 5B

Protect against harmful substances. EN 13982
 Type 5B protects against biologically contaminated particles. EN14126.

EN 1073-2 EN 1073-2

Protects against radioactive particle contamination in accordance with EN 1073-2 (not against radioactive radiation).

TYPE 6 Types 6 & 6B

Limited splash-proof protection. Protect when there is a risk of splashing on the suit. EN 13034.
 Type 6B Projects against biologically contaminated particles. EN 14126.

TYPE 4 Types 4 & 4B

Splash-proof protection: Suits are approved for the saturation of a liquid that can condense on the suit. The suits must have welded seams. Penetration testing has to be conducted according to EN 369 to provide information on protection in relation to individual chemicals. EN 14605. Type 4B protects against biologically contaminated particles. EN 14126.

EN 14126 EN 14126

Protects against biologically contaminated particles. EN 14126.

EN 1149-5 EN 1149-5

Electrostatic protection according to EN 1149-5 (with proper earthing).

COVERALL SUIT

- High Risk Category III PPE coverall suit
- Tailored to provide comprehensive level of protection, durability and comfortability
- Assembled from one piece of coverall suit, attached hood, zipper at front opening, adhesive flap, elastic cuffs, ankles, hood and waist
- Defense against airborne solid particulates, non hazardous liquids, infective agents and electrostatic properties

ARE YOU PROTECTED?

Choosing the appropriate apparel is a key component in minimizing the spread of potentially infectious diseases.

Understanding AAMI PB70:2012

Every piece of protective apparel tailored may look similar visually but the guidelines below can assist your selection ensuring your surgical gowns are catered specifically to your procedure and environment.

AAMI PB70:2012

AAMI LEVEL 1

MINIMAL FLUID BARRIER PROTECTION

Used for daily patient care, when there is little to no risk of fluid exposure.

AAMI LEVEL 2

MINIMAL TO LOW FLUID BARRIER PROTECTION

For use only for low-fluid, minimally invasive surgical procedures, lumps and bumps.

AAMI LEVEL 3

MODERATE FLUID BARRIER PROTECTION

Used for the widest range of surgical procedures, where moderate fluid protection is indicated.

BARRIER PROTECTION	RESISTANCE MEASURES	TEST	TEST CRITERIA	ACCEPTABLE QUALITY LEVEL
AAMI Level 1	Liquid Penetration	AATCC42	Water Impact \leq 4.5g	4%
AAMI Level 2	Liquid Penetration	AATCC42 AATCC127	Spray Impact \leq 1.0g Hydrostatic Pressure \geq 20cm	4%
AAMI Level 3	Liquid Penetration	AATCC42 AATCC127	Spray Impact \leq 1.0g Hydrostatic Pressure \geq 50cm	4%

SURGICAL GOWN

AAMI Level 3 (Standard)

- Meets ANSI/ AAMI PB70 Level 3, where risks of fluid exposure, splash and pressure on gown are moderate
- Passed water resistant: Impact Penetration AATCC 42 at Spray Impact $\leq 1.0g$
- Passed water resistant: Hydrostatic Pressure AATCC 127 at Hydrostatic Pressure $\geq 50cm$
- Catered for procedures such as Mastectomies, Arthroscopic Orthopedic, Endoscopic Urological, Open Gastrointestinal and Genitourinary

AAMI Level 3 (Reinforced)

- Additional PE protection on both sleeves and front chest acts as an extra barrier against potentially infectious blood or other bodily fluids
- Ideal for longer procedures and those with large amount of fluids

Premium Plus (Standard)

- Single use apparel
- Performance and efficiency oriented design
- Ability to minimize risks of infections
- Knitted cuff for secure closure
- Tailored to optimize surgeons comfort and dexterity throughout operations
- Effortless and convenient wearability
- Provides soft-feel comfort

Premium Plus (Reinforced)

- Additional PE protection on both sleeves and front chest acts as an extra barrier against potentially infectious blood or other bodily fluids

STERILIZATION PRODUCTS

Sterilization products serve as a crucial barrier system designed to maintain the sterility of medical or dental instruments and equipment until they are ready to use.

Professionals may choose either sterilization pouch, reel or wrapper. When it comes to the selections - proper sizing is the key factor ensuring the effectiveness of sterilization processes.

If a sterilization pouch is your choice, it is crucial to make sure a pouch should be large enough (Approximately $\frac{1}{4}$ - $\frac{1}{2}$ inch circumferential space) to allow the contents to move slightly from side to side without compromising the integrity of the pouch, stressing the internal seams, or risking punctures. Make sure you still be able to close the pouch properly using the perforated, self-adhesive seal.

Sterilization reels are another alternative sterilization product used in the sterilization process. The key advantage of this product is its customizable instrument sizes.

Similarly, selecting the appropriate size is a seemingly minor yet essential aspect that cannot be overstated when it comes to the wrapper. Proper sizing plays a pivotal role in ensuring the effectiveness of the sterilization processes and operational optimization within the healthcare setting.

In evaluating wrap products, professionals should evaluate the products based on performance characteristics. The intended use of the product in the professional's facility must be assessed.

Choosing the right products is an essential step to mitigate the risk of healthcare-associated infections (HAIs) and upholding patient safety standards.

POUCHES

Intended use:

This Pouches are used for packing the medical devices before sterilization and maintain the sterility of the products after sterilization. Sterilization Pouches are single use only.

Sterilization Compatibility:

- With triple side for secure closure and double indicator (inside and outside of the pouch).
- EO and Steam duo indicator. These are not suitable for use in plasma sterilization systems.

Duo Indicator

CROSS PROTECTION®

HOSPITAL ADMISSION

Why use disposable?

Disposable clothing, linens and other items dramatically decreases time consuming chores. No more time or money wasted on expensive washing, bleaching, drying or ironing procedures. You can also say goodbye to multiple washings of the same load because some items remain unwashed. Our linens, drapes and clothing always come new, hygienic, clean, relatively cheap and available for immediate use.

Does disposable save money?

We sell products that cost roughly the same amount or even less than the cost of washing similar, traditional materials. When one includes the other products and materials that must be bought for the washing procedure, such as machine costs, fabric softener, water and electricity. You do not need to worry about saving money by purchasing of disposable cloth. To control your budget, you must know your various expenses and when they have to be paid. Disposable products can help you control your budget because they become a regular, measurable cost. You no longer have to fear staff falling sick or absent, unable to wash the linens. Disposable is always available and ready, at a lower cost than most reusable products when one factors in their care and cleaning.

Does disposable look professional?

Don't forget that image means a lot when it comes to clients. Always clean and hypoallergenic, disposable linens and clothing give an impression of impeccable hygiene. With disposable bedding, all your sheets are new and spotless from their first moment of use. Disposable makes your team more flexible and ready to respond to rapid increases in activity without worry. It's a form of thinking ahead.

Why choose Cross Protection?

We manufactured all kinds of linens, and apparels. Our trademark material Cotton Soft is catered to high quality and performances, especially in the areas of skin dryness, odor reduction and inhibition of bacterial growth.
